**Subject:** RE: Daily HBC Suspicious Purchasing Report - 11/13/13

My first concern is to verify that the orders are supported by the business need and not a result of diversion. Thank you for the information. Since the average utilization of the chain is low, they will continue to flag every day the report runs.

Joe - I discussed with Tony at Bridgeville - he will provide some names of the clinics and MDs using the buprenex. He said there are several around there and with proximity to 79, they are very busy.

They do scrutinize these when filling and have/continue to call the clinics on any questionable ones and turn some away.

He said Rite Aid is also one of the nearby pharmacies to these clinics that carries a lot as well.

Todd and Bobby,

Can you please check with the two stores listed on the attached spreadsheet to see if the increase in ordering is legitimate? Below are some questions to ask.  
Thank you,

Joe

Please respond to these questions in regards to your request for an increase in narcotic order points. The adjustment in order points will be based on this data.

1. Has your store experienced an overall increase in prescription volume compared to last year? If so, what is the % increase?
2. Has your pharmacy had an acquisition within the last year? no
3. Has a new physician practice opened in your geographic location within the last year?
4. Do you have a patient or multiple patients that require these drugs ?

5. Is your pharmacy located near a hospital or facility that specializes in these drugs ?
6. Other reasons that may justify raising the monthly ordering controlled substance ordering threshold?

We have had 2 pharmacies exceed the purchasing thresholds for certain controlled products so far this month.
